Dear Selection committee,

My name is Onu Princeley Toochukwu and I write to express my interest in application for a master's degree program in Environmental Management, slated for 2022/2023 session of the university calendar. I believe that my educational background, coupled with my work experience would enable me to make a remarkable contribution at the university. I graduated in the year 2015, from Ebonyi state university, in bachelor degree, with a second class upper division in Geology and Exploration Geophysics department.

My zeal to studies and self-improvement has always been top notch and unrelenting. I have been an active staff of National Centre for Energy Research and Development, a subsidiary of Energy Commission of Nigeria, where I have been actively involved in the research of renewable energies and sustainable environment. Moreover, I would like to continue my studies In order to gain more knowledge and experience in an academic environment and I believe that a master's degree program in Environmental Management would offer me the possibility of receiving the complete picture all aspect of this field.

The reason for choosing specifically, this master's program , comes from the fact that in the near future, I would like to be well rounded in Environmental Management and get well acquainted with all its branches with the aim of contributing immensely in the academic world and improvement of my environment. I already have some innovative ideas as regard to some researches in the said field, but unfortunately, I don't have the right tools and enabling environment for a proper research and putting them into practice. And, this is why I believe that this master's program would be an excellent starting point for me to achieving my life ambition.

Furthermore, if I get selected for this program, I will have the rare opportunity to learn from the very best in the world and from the fact that I would study in an international environment will give me the privilege to create new relationship with people from different and diverse cultures. I am also aware of the dedication and perseverance I will need to have, to achieving the very best results in this field.

Finally, I look forward to joining the master's degree program in Environmental Management in order to improve my abilities, environment and gain new skills. And, I wait patiently for a positive reply.

Sincerely

Onu Princeley Tooohukwu.
